ANBUSELVI A

Professional Summary

Senior Java Developer with 6+ years of experience in designing, developing, and maintaining enterprise-scale applications across Travel & Leisure and Banking domains. Strong expertise in Java 17/21, Spring Boot, Microservices, Apache Kafka, Apache Flink, Redis, Oracle Database, and AWS & GCP Cloud technologies. Experienced in developing scalable REST APIs, event-driven architectures, distributed systems, and cloud-native applications. Skilled in Agile methodologies, CI/CD pipelines, performance optimization, and production support.

Experience

Cognizant Technology Solutions-Aug 2025 to Present Aug 2025 – Present
Senior Associate *Chennai, India*

- **Client:** Travel Leisure
- **Project:** Hotel Booking Platform
- **Description:** Cloud-based hotel reservation and booking platform enabling hotel search, room availability management, booking, payment processing, loyalty programs, and customer notifications.
- Engineering microservices using Java 17/21 and Spring Boot following domain-driven design principles.
- Created and delivered RESTful APIs for hotel search, booking, reservation management, and customer services.
- Established event-driven communication using Apache Kafka for real-time booking and notification processing.
- Built real-time data processing solutions using Apache Flink for streaming analytics and booking event processing.
- Integrated Redis caching to improve API response time and reduce Oracle database load.
- Enhanced Oracle SQL performance through query tuning, indexing strategies, and database optimization techniques.
- Leveraged AWS services including EC2, S3, RDS, IAM, and CloudWatch to support cloud-native applications.
- Participated in code reviews, production support, root cause analysis, and performance tuning activities.
- Collaborated with business analysts, QA teams, architects, and DevOps teams within Agile Scrum environments.
- Leveraged GCP services to support cloud-native microservices, application deployment, monitoring, and scalable backend workloads.

Capgemini - Jun 2024 to Aug 2025 Jun 2024 – Aug 2025
Consultant *Chennai, India*

- **Client:** Standard Chartered Bank
- **Project:** SCPay Fast
- **Description:** Real-time payment processing platform supporting instant payment validation, routing, transaction processing, and settlement operations.
- Built and maintained payment microservices using Java 17 and Spring Boot.
- Configured business rules and payment routing workflows using expression language frameworks.
- Integrated Kafka and Solace messaging systems for real-time payment processing.
- Created PostgreSQL database objects and streamlined query execution for improved system performance.
- Automated build and deployment activities using Jenkins CI/CD pipelines and Git.
- Deployed applications on OpenShift and monitored production environments using Kibana.
- Participated in sprint planning, code reviews, testing support, and release activities.

Client Linx Software Pvt Ltd Oct 2019 – May 2024
Java Developer *Chennai, India*

- **Project: Business Portal - Oct 2019 to May 2024**
- **Description:** Enterprise web application for managing business operations, user management, reporting, workflow automation, and secure access management.
- Created backend services using Java and Spring Boot for enterprise business applications.
- Built secure authentication and authorization modules to protect sensitive business data.
- Engineered REST APIs and integrated external systems to streamline business processes.

- Created MySQL database schemas and improved query performance through database tuning.
- **Project: IVR Call Tracking - Jun 2022 to May 2024**
- **Description:** Call monitoring and reporting platform used to track customer interactions, analyze call data, and generate operational reports.
- Built reporting and monitoring modules for IVR Call Tracking systems.
- Integrated call tracking mechanisms to capture and process customer interaction data.
- Created real-time monitoring and reporting features for operational teams.
- Collaborated with stakeholders to enhance reporting accuracy and system reliability.
- Performed bug fixing, production support, and application maintenance activities.

Technical Skills

Programming Languages: Java 8, Java 11, Java 17, Java 21, SQL, JavaScript
Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Microservices
Messaging & Streaming: Apache Kafka, Kafka Streams, Apache Flink, Solace
Databases: Oracle, PostgreSQL, MySQL, Redis
Cloud Platforms: AWS (EC2, S3, RDS, IAM, CloudWatch), GCP (GKE, Cloud Run, Cloud Storage)
DevOps Tools: Docker, Jenkins, OpenShift
Tools: Git, Maven, Postman, Swagger, IntelliJ IDEA, Eclipse, Kibana
Methodologies: Agile Scrum, CI/CD, REST API Development, Event-Driven Architecture, Distributed Systems

Education

University of Madras Chennai, India
Bachelor of Computer Science – Percentage: 87% *2019*

Certifications

- Jenkins CI/CD Pipeline Automation Training
- JavaScript Professional Training

Achievements

- Recognized by project stakeholders for successful delivery of critical application enhancements and production support activities.
- Contributed to the successful implementation and deployment of enterprise applications across Banking and Travel Leisure domains.
- Actively participated in Agile ceremonies, code reviews, and knowledge-sharing sessions to improve team productivity and delivery quality.
- Received appreciation from University of Madras for academic excellence and contributions during undergraduate studies (2019).
- Participated in Amazon Alexa Conference (2019), showcasing Artificial Intelligence concepts and innovative technology solutions.
